

# PROJECT DESIGN PHASE

## Strategic Product Placement Analysis

### Problem Solution Fit

#### Customer Segment

- Retail store managers
- Business analysts
- Marketing teams
- Inventory managers

#### Customer Constraints

- Limited analytical expertise.
- Lack of visualization tools.
- Large amounts of raw sales data.
- Difficulty identifying trends manually.

#### Available Solutions

- Spreadsheet analysis.
- Manual sales reporting.
- Traditional business reports.

#### Jobs To Be Done

- Improve product visibility.
- Increase sales performance.
- Optimize shelf utilization.
- Understand customer purchasing behavior.

#### Proposed Solution

Develop an interactive Tableau dashboard that provides insights into customer purchasing patterns and product performance.

#### Proposed Solution

The proposed solution uses Tableau Desktop to transform raw sales data into meaningful visual insights. Interactive dashboards and story points help decision-makers understand customer behavior and optimize product placement strategies. The system identifies trends, high-performing products, and underperforming categories, allowing businesses to make informed decisions.

## Novelty

- Interactive visual analytics.
- Real-time exploration of data.
- Business-oriented recommendations.

## Social Impact

- Better customer shopping experience.
- Improved business efficiency.
- Enhanced decision-making.

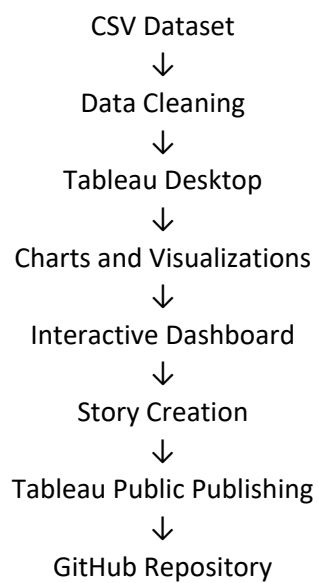

## Revenue Model

Improved product placement increases product visibility and contributes to higher sales revenue.

## Scalability

The approach can be expanded to multiple stores and larger retail chains.

### Solution Architecture

## Technology Stack

| Component            | Technology Used      |
|----------------------|----------------------|
| Dataset Storage      | CSV File             |
| Data Visualization   | Tableau Desktop      |
| Dashboard Publishing | Tableau Public       |
| Version Control      | GitHub               |
| Documentation        | PDF Reports          |
| Data Analysis        | Tableau Calculations |
